

AWX Economics

WHAT IS AURUS?

Aurus is a fintech company seeking to create AurusGOLD (AWG), a globally viable currency by combining the demonstrable reputation of gold with the efficiency and scalability of the blockchain. We believe that blockchain can make gold mainstream by allowing people to trade cents worth of physical gold instantly, around the world, thus providing unprecedented liquidity in the gold space.

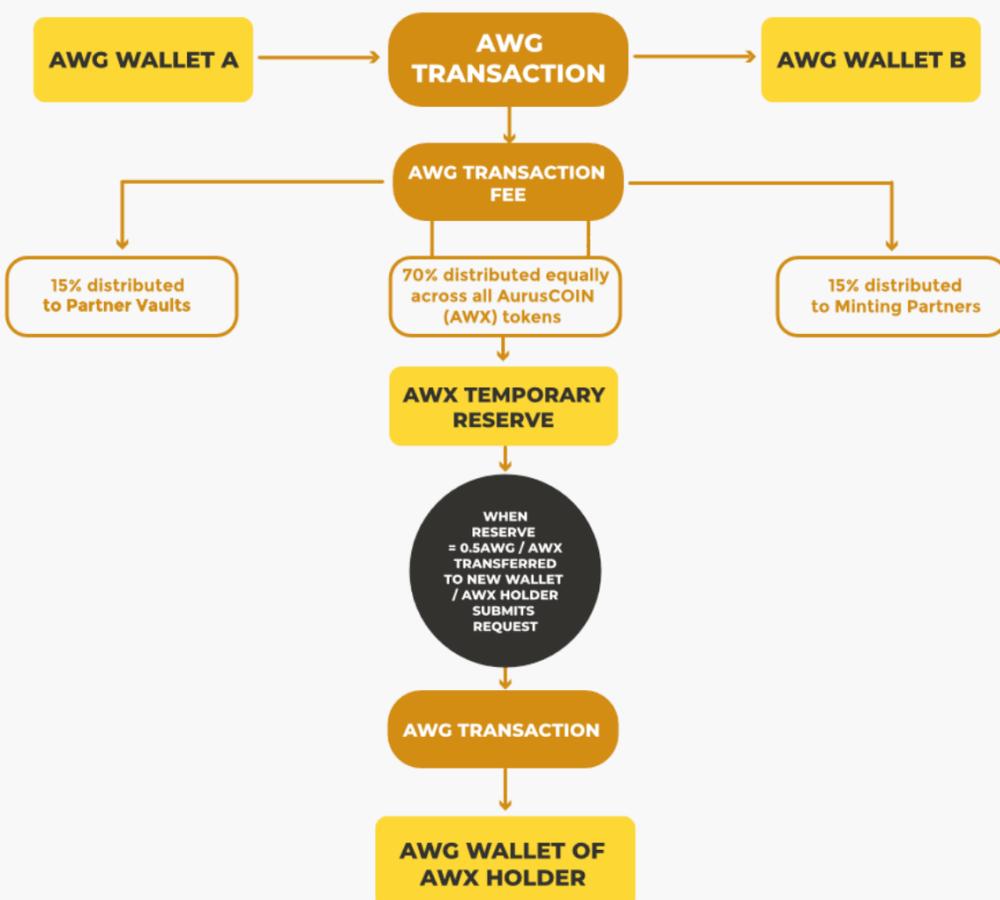

AWG - GOLD-BACKED TOKEN

AurusGOLD (AWG) is a 100% gold-backed cryptocurrency. Each AWG token is fully collateralized with 1 gram of physical gold, stored in partnered, fully-audited and insured vaults. AWG is redeemable for physical gold at any time. Aurus charges a modest transaction fee of 0.015% or 0.05 AWG (whichever is greater) to the initiator of each AWG transaction.

AWX - REVENUE SHARE TOKEN

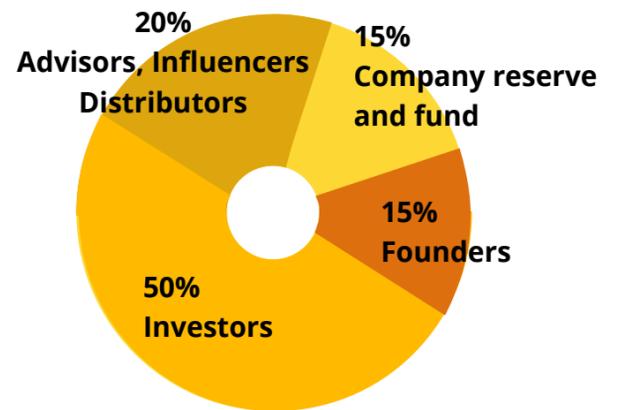

AurusCOIN (AWX) is a revenue sharing token limited to a total supply of 30,000,000. As people around the world trade AWG, 70% of all the generated transaction fees are proportionally distributed across all AWX holders (paid in AWG). The remaining 30% of the generated fees are allocated towards the ecosystems' operational costs as follows: 15% to gold providers, 15% to vault partners.

HOW AWX WORKS

AWX Distribution

TOTAL SUPPLY
30,000,000 AWX

PARTNERS

A SELF SUSTAINING ECO-SYSTEM

AWG and AWX together enable a highly scalable, self-sustaining ecosystem to exist. AWX holders directly benefit from the increase in the usage of AWG as the revenues from fees rise. Therefore, the value of AWX is likely to increase parallel to the usage of AWG.

JOIN THE ECO-SYSTEM!

Aurus will use the allocated budget of 6,000,000 AWX to compensate various entities (companies/individuals) for their added value towards the ecosystem. This includes:

- **AWG Minting partners** - Gold providers, vaults, auditing partners.
- **Liquidity providers** - Market makers, exchanges.
- **Distribution partners** - merchants, gold brokers.
- **Marketing partners** - content creators, affiliates, influencers, brand ambassadors.
- **The Market** - People who believe in the future of AWG.

Whether it be through providing gold, catering for demand or spreading the word, it's in the best interest of all AWX holders to increase the widespread usage of AWG one way or another.

Get yourself some AWX and join the ecosystem!

COMPANY TIMELINE

HIGHLIGHTS SO FAR

Aurus founded in 2017

Aurus closes €300,000 seed round (AWX valued at €0.14)

Aurus blockchain protocol finished

partnership with gold providers and vaults

partnership with liquidity providers (exchanges, brokers)

Aurus protocol receives positive regulatory ruling overseen by Capital Law UK

OCTOBER (AURUS LAUNCHES!)

First gold allotment is tokenized into AWG

AWX token deployed onto the mainnet and distributed to investors and stakeholders

First round of AWX crowdfunding begins starting at €0.55. (15,000,000 AWX to be sold over the course of 6 months. Value is adjusted monthly based on the growth of the protocol)

NOVEMBER

AWG soft-wallet integration

AWG is listed on two exchanges

DECEMBER

AWG online distribution channels - any website can sell AWG for commission with our Iframe plugin

Q1 - 2020

Partner with e-commerce merchants to accept AWG as payment

Q2 - 2020

Last round of AWX crowdfunding finalizes - 15,000,000 AWX sold

€10 million worth of gold on the protocol (estimated AWX value €1.75)

AWX is listed on exchange on April 15th (6 months after token distribution)

Research and investigation begins in the tokenization of other assets
